C- Pool

problem 0

Ratio

Write a c code that will ask the user to enter four values a,b,c and d then evaluates the ratio of (a + b) to (c-d) and prints the result, if (c-d) is not equal zero

expected output

```
Enter integer value one 5
Enter integer value two 6
Enter integer value three 7
Enter integer value four 3
Ratio is 2.75
```
